EDUCATION ACTIVITIES

METHODOLOGY / LEARNING ACTIVITIES in-class **MASTER LESSON:** Unlike classical lecture, where the main weight lies on the teacher, in participatory lecture we want the student to pass from a passive to an active role, encouraging their participation. This requires a good structure of content, a professor clear exposition and be able to hold the attention and interest of the student, encouraging their participation and curiosity by giving suggestions, questions, readings, etc.

INDEPENDENT WORK. With this approach the student takes the initiative with or without the help of others (teachers, peers, tutors, mentors). He/She will search for their learning needs, formulate learning goals, identify the resources you need to learn, choose and implement appropriate learning strategies and evaluates the results of their learning. The teacher becomes the guide, facilitator and source of information that assists in the self-learning style. This methodology will be of particular interest for the development of skills related to self-research.

COOPERATIVE TEAM WORK: The number of students in our university we scheduled allows working in small groups. Cooperative team work is defined as "instructional strategies in which students are divided into small groups and are evaluated on group productivity", which puts both individual responsibility as positive interdependence, It's an American professional teamwork game.

CASE METHOD: Learning acquisition through case studies or actual management situations. This technique of active learning, focusing on research student on a real and specific problem, helps students acquire the basics for an inductive kind of study.

TUTORIAL SYSTEM ACTION: including interviews, focus groups, self-reports and tutorial reports.

RESEARCH: Finding information with a previous target from various sources and documents, analysis and synthesis of data and development of conclusions, alone or in collaboration with other researchers or departments

outside the classroom.
