SUBJECT DESCRIPTION

Equip learners with the knowledge, skills and techniques which will enable them to use the English language as a tool for communication and in the workplace, in particular, within the area of Physiotherapy. Technical English II is an optional course, which carries 3 ECTS credits, implying 75 hours of dedication on the learner's part. It is taught in the Seventh Semester of the Fourth Year of the Physiotherapy Degree studies. Technical English II forms part of a well rounded, integral education focused on the learner in all of his or her harmoniously integrated dimensions

(intelligence, will, emotional nature, sociability, abilities, skills...).

GOAL

To develop and improve the learner's overall communicative skills in English through active listening and speaking, and in particular, to increase the learner's understanding and use of vocabulary and language structure as well as reading and writing skills.

PRIOR KNOWLEDGE

This course recommends students to have a basic knowledge of the English language, understanding that they have successfully completed the English Language Test Section in the Spanish State University Access Exam (EBAU). (See: The Common European Framework of Reference for Languages)

COURSE SYLLABUS

A robust skills and language CEFR-aligned syllabus using contexts for learning new language that provide engaging real-life situations and stories exposing students to authentic English usage and providing realistic models for language production. It is designed to promote effective communication and helps to build learners' confidence with regular opportunities for meaningful practice using various methodologies like 'Flipped classroom' and 'Cooperative learning'.

Lessons give students concrete learning objectives and a sense of progress. All sections have tasks that move from global to detailed understanding so students can achieve a good overall comprehension.

Reading and listening sections allow students to practise their receptive skills.

The approach to grammar is inductive. Students are exposed to new language in context. Each grammar section prompts the student to notice the feature in context and to discover its form and use. Students then have further opportunities for controlled practice before using their new language in more authentic spoken or written output.

EDUCATION ACTIVITIES

In second-language teaching-learning methodology, the how is as important as the what or even the final result. The methodology applied in this course is therefore communicative, eclectic and collaborative. 'Communicative' implies active participation and involvement. 'Eclectic' takes into account different teaching-learning styles, allowing the student to develop and activate his/her own learning. 'Collaborative' provides the learner with the opportunity, both individually and in collaboration with others, to acquire more autonomy as well as a greater sense of responsibility for self and others. The teacher is a guide in this learning process. This communicative, eclectic, collaborative methodology implies:

IN CLASS:

- Interactive class lectures
- Student presentations and student-led discussions
- Group and pair activities: role-plays, simulations, interviews, research, project work, online forums,

etc.

- Feedback mechanisms
