SUBJECT DESCRIPTION

Teaching Foreign Languages is a course which aims to demonstrate and propose English language teaching methods, including those factors which intervene in the English teaching-learning process in the field of early childhood education. The student will learn to search for resources and create materials, as well as perform practical and motivating activities which aim to encourage and promote second language learning within an early childhood context.

It also seeks to equip learners with the knowledge and skills which will enable them to use the English language in their future work environment as true professionals in the field of education by improving their language skills.

The subject 'Teaching Foreign Languages' reminds us of the narrow relationship that exists between language and communication. It provides the opportunity to consolidate our understanding and knowledge of how a second language is taught and learnt throughout the different stages of childhood. This understanding and knowledge in turn aids us in gaining an overall perspective of the many different approaches and methodologies which have evolved with regards to language teaching and learning over the past century, thus increasing our awareness of how a foreign language is taught and learnt in our current era.

In a more global sense, in the area of early childhood education, our aim is that future teachers become true professionals with a true love and vocation for teaching, for awakening within their pupils an interest and passion for communicating in other languages, for raising questions about and exploring other cultures, simply because getting to know other languages and other cultures makes the person more aware of their own language and culture, that is, of one's self. Above all, our aim is to train and educate teachers who are not so much concerned with the subject matter at hand as with the encounter with the learner in front of them at that moment, together with the full reality and lifetime project enclosed within that person.

GOAL

The intention behind 'Teaching Foreign Languages' is to create an awareness and appreciation of the role and value in knowing more than one language in our world today, a role which is not only useful and practical for one's future professional career, but also for one's own personal life, especially regarding personal growth and development as well as understanding, empathy and communication with others.

This course intends to awaken interest and curiosity in the world of teaching English as a second/foreign language. It also aspires to foster favorable attitudes towards second/foreign language teaching and learning in future teachers; to familiarize them with the processes involved; with different approaches and methodologies which can be applied; and to explore, experience and experiment with some of the different methods and best practices which encourage second/foreign language learning.

PRIOR KNOWLEDGE

It is highly recommended that the student have a B1+/ B2 level of English. (See the Common European Framework of Reference for Languages)

EDUCATION ACTIVITIES

In second-language teaching-learning methodology, the how is as important as the what or even the final result. The methodology applied in this course is therefore communicative, eclectic and collaborative. 'Communicative' implies active participation and involvement. 'Eclectic' takes into account different teaching-learning styles, allowing the student to develop and activate his/her own learning. 'Collaborative' provides the learner with the opportunity, both individually and in collaboration with others, to acquire more autonomy as well as a greater sense of responsibility for self and others. The teacher is a guide in this learning process.

NOTE:

Teaching activities and work time distribution may be subject to changes and adapted to the different scenarios established in accordance with directives issued by the pertinent health authorities.
