SUBJECT DESCRIPTION

Equip learners with the knowledge and skills which will enable them to use the English language in their future work environment as true professionals in the field of education by improving their writing and communicative skills.

The Organization of the English Curriculum within the Spanish Education System is a course, which is optional

and which carries 6 ECTS credits, implying 150 hours of dedication on the learner's part, taught in the seventh Semester of the fourth year of Early Childhood Education Degree studies. This course is embodied within the Area of Language Teaching and Learning within the Module: Teaching and Discipline.

The Organization of the English Curriculum within the Spanish Education System forms part of a well-rounded, integral education focused on the learner in all of his or her harmoniously integrated dimensions (intelligence, will, emotional nature, sociability, abilities, skills...). In the area of early childhood education, our aim is that future teachers become true professionals with a true love and vocation for teaching, for awakening within their pupils an interest and passion for communicating in other languages, for raising questions about and exploring other cultures, simply because getting to know other languages and other cultures makes the person more aware of his or her own language and culture, that is, of one's self. Above all, our aim is to train and educate teachers who are not so much concerned with the subject matter at hand as with the encounter with the learner in front of him or her at that moment, together with the full reality and lifetime project enclosed within that person.

GOAL

The intention underlying the subject 'The Organization of the English Curriculum within the Spanish Education System' is to increase awareness of the importance and role that second/foreign language teaching and learning holds within the curriculum in the Spanish education system in early childhood and primary education. As well, it offers the opportunity to explore second/foreign language teaching and learning in different types of schools and other countries in order to compare and contrast similarities and differences between different programs both within and outside of Spanish borders.

PRIOR KNOWLEDGE

It is highly recommended that the student have a B2 level of English. (See the Common European Framework of Reference for Languages)

COURSE SYLLABUS

- 1) Historical Evolution of Foreign Language Learning in the Spanish Education System
- 2) Bilingual Schools
- 3) Organization of Foreign Language Teaching in the Spanish Curricula
- 4) Pre-Literacy - Phonics
- 5) Application of Curricular Design - CLIL

EDUCATION ACTIVITIES

In second-language teaching-learning methodology, the how is as important as the what or even the final result. The methodology applied in this course is therefore communicative, eclectic and collaborative. 'Communicative' implies active participation and involvement. 'Eclectic' takes into account different teaching-learning styles, allowing the student to develop and activate his/her own learning. 'Collaborative' provides the learner with the opportunity, both individually and in collaboration with others, to acquire more autonomy as well as a greater sense of responsibility for self and others. The teacher is a guide in this learning process.
