SUBJECT DESCRIPTION

This course will tackle theoretical questions concerning oral skills in the foreign language paying specific attention to the structure, the planning and the evaluation of oral activities as well as the understanding of the cognitive processes which take place when the students develop oral skills. These concepts will be mobilized and applied in concrete classroom situations proposed by the students and the teacher. Once these minimal contents are established, we will deal with more specific questions related to how this corpus of knowledge can be applied to bilingual school contexts. A great variety of resources will be employed to train the teacher in this regard. In order to do so, we will particularly emphasize the importance of the information and communication technologies.

GOAL

This course pursues three goals:

Apply acquired knowledge to plan and adapt activities and oral projects in educational contexts, especially those which use the CLIL methodology.

Detect difficulties and learn to solve difficulties in oral skills which affect the foreign language speaker.

Get familiar with the evaluation techniques necessary to facilitate the students' development of oral skills.
