Course:	PERSONALITY PSYCHOLOGY		
Type:	Compulsory	ECTS credits:	6
Year:	2	Code:	6121
Teaching period:	Third semester		
Area:	Criminological psychology		
Module:	Health Sciences		
Teaching type:	Classroom-based		
Language:	Spanish		
Total number of student study hours:	150		

SUBJECT DESCRIPTION

--

SKILLS

Basic Skills

Students must have demonstrated knowledge and understanding in an area of study that is founded on general secondary education. Moreover, the area of study is typically at a level that includes certain aspects implying knowledge at the forefront of its field of study, albeit supported by advanced textbooks

Students must be able to apply their knowledge to their work or vocation in a professional manner and possess skills that can typically be demonstrated by coming up with and sustaining arguments and solving problems within their field of study

Students must have the ability to gather and interpret relevant data (usually within their field of study) in order to make judgments that include reflections on pertinent social, scientific or ethical issues

Students must be able to convey information, ideas, problems and solutions to both an expert and non-expert audience

Students must have developed the learning skills needed to undertake further study with a high degree of independence

General Skills

To be familiar with and apply analytical techniques and procedures for research in problem-solving, decision-making and issue of reports concerning issues submitted for consideration in the field of criminology.

To research, manage sources and handle information.

Specific skills

To be familiar with the biological foundations of human behaviour and their relationship with psychological functions; and interaction of individual factors with social and psychological processes and their practical application.

To link knowledge of the cognitive processes and the development of personality to research and studies on criminal behaviour.

To understand and value the influence of psychological characteristics, the psychosocial environment and the psychopathological and psychosociological processes linked to criminal behaviour and victimisation processes.

To be familiar with and value the role played by cognitive processes in obtaining witness evidence.

To design preventive policies for minors applying knowledge of relevant psychological processes and characteristics.
