## **SKILLS**

### **Basic Skills**

Students must have demonstrated knowledge and understanding in an area of study that is founded on general secondary education. Moreover, the area of study is typically at a level that includes certain aspects implying knowledge at the forefront of its field of study, albeit supported by advanced textbooks

Students must be able to apply their knowledge to their work or vocation in a professional manner and possess skills that can typically be demonstrated by coming up with and sustaining arguments and solving problems within their field of study

Students must have the ability to gather and interpret relevant data (usually within their field of study) in order to make judgments that include reflections on pertinent social, scientific or ethical issues

Students must be able to convey information, ideas, problems and solutions to both an expert and non-expert audience

Students must have developed the learning skills needed to undertake further study with a high degree of independence

### **General Skills**

Ability to carry out synthetic and analytical thought.

To have developed a capacity for leadership.

To have developed the necessary skills to ensure problems are solved and goals are reached.

To have developed the necessary skills for effective organisation and planning in order to obtain improved business administration and management.

### **Specific skills**

To be able to approach a subject by means of rigorous, profound and comprehensive thought.

To adopt attitudes of leadership and social responsibility on both a personal and professional level.

To be able to proficiently use the necessary tools to find an optimum financial balance between equity and long-term debt.

To have the capacity to administer a company's finances.
