## SKILLS

### Basic Skills

Students must have demonstrated knowledge and understanding in an area of study that is founded on general secondary education. Moreover, the area of study is typically at a level that includes certain aspects implying knowledge at the forefront of its field of study, albeit supported by advanced textbooks

Students must be able to apply their knowledge to their work or vocation in a professional manner and possess skills that can typically be demonstrated by coming up with and sustaining arguments and solving problems within their field of study

Students must have the ability to gather and interpret relevant data (usually within their field of study) in order to make judgments that include reflections on pertinent social, scientific or ethical issues

Students must be able to convey information, ideas, problems and solutions to both an expert and non-expert audience

Students must have developed the learning skills needed to undertake further study with a high degree of independence

### **General Skills**

To apply theoretical knowledge in the solving of problems.

To research, manage sources and handle information.

To acquire an ability for analysis, synthesis, assessment and critical reasoning.

To learn independently.

To communicate orally and in writing within different contexts, using technical language when the situation calls for it.

To develop the areas needed to promote teamwork, adapting to new situations, being tolerant, and developing ethical behaviour and social commitment.

### **Specific skills**

To create and develop criteria for problem-solving and decision-making.

To provide creative and imaginative solutions, thanks to the approach or sources used, to legal, personal and professional problems.

To develop an ability for negotiation and reconciliation in resolving conflicts.

To apply ethical principles and values in both personal and professional life.

The development of legal dialectics

To handle (legal, jurisprudential and doctrinal) law sources applicable to the matter of study.

To use the computer network (Internet) to obtain information and communicate data.

To apply legal reasoning techniques, offering one's viewpoint in a reasoned, informed and tolerant manner.

To reflect on one's learning with self-criticism, identifying areas for improvement based on criteria of quality and excellence.

To use feedback.

To read and interpret legal texts.

To draft legal texts and other documents of interest to the university community in a clear, precise manner using legal terminology correctly.

To work in teams, actively contributing to group tasks and objectives.

To nurture attitudes of leadership and social responsibility in personal and professional performance.
