## SUBJECT DESCRIPTION

In the current process of educational renewal, the Teaching of Social Sciences is seen as one of the main areas of work for teachers to develop the teaching-learning process related to the subject entitled Knowledge of the Physical, Social and Cultural Environment. This is not random, however, and includes: a creativity development process, innovation, understanding and skills resulting from an exchange in which students are a significant active factor of discovery in the search for meaning in our surroundings, based on geographical, historical and social knowledge.

## SKILLS

### Basic Skills

Students must have demonstrated knowledge and understanding in an area of study that is founded on general secondary education. Moreover, the area of study is typically at a level that includes certain aspects implying knowledge at the forefront of its field of study, albeit supported by advanced textbooks

Students must be able to apply their knowledge to their work or vocation in a professional manner and possess skills that can typically be demonstrated by coming up with and sustaining arguments and solving problems within their field of study

Students must have the ability to gather and interpret relevant data (usually within their field of study) in order to make judgments that include reflections on pertinent social, scientific or ethical issues

Students must be able to convey information, ideas, problems and solutions to both an expert and non-expert audience

Students must have developed the learning skills needed to undertake further study with a high degree of independence

### General Skills

To be familiar with the syllabus areas for primary education, the interdisciplinary relationship between them, assessment criteria and the body of didactic knowledge applicable to teaching and learning procedures.

To design, plan and evaluate teaching and learning processes, both individually and in cooperation with other teachers and school professionals.

### Specific skills
