Teaching guide

IDENTIFICATION DETAILS

Degree:	Nursing
Field of Knowledge:	Health Science
Faculty/School:	Health Sciences
Course:	BIOETHICS AND DEONTOLOGY
Type:	Compulsory
ECTS credits:	6
Year:	4
Code:	2956
Teaching period:	Seventh semester
Area:	Theoretical and Methodological Bases of Nursing
Module:	Nursing Sciences
Teaching type:	Classroom-based
Language:	Spanish
Total number of student study hours:	150

SUBJECT DESCRIPTION

SKILLS

Basic Skills

Students must have demonstrated knowledge and understanding in an area of study that is founded on general secondary education. Moreover, the area of study is typically at a level that includes certain aspects implying knowledge at the forefront of its field of study, albeit supported by advanced textbooks

Students must be able to apply their knowledge to their work or vocation in a professional manner and possess skills that can typically be demonstrated by coming up with and sustaining arguments and solving problems within their field of study

Students must have the ability to gather and interpret relevant data (usually within their field of study) in order to make judgments that include reflections on pertinent social, scientific or ethical issues

Students must be able to convey information, ideas, problems and solutions to both an expert and non-expert audience

Students must have developed the learning skills needed to undertake further study with a high degree of independence

General Skills

To be able to provide technical and professional healthcare in the field of nursing in line with the health needs of people cared for, in accordance with the development of scientific knowledge at any given time and the levels of quality and security established in the pertinent legal and deontological regulations.

To protect the health and well-being of people, families or groups receiving care, ensuring their safety and security.

To establish effective communication with patients, families, social groups and colleagues, and to foster health education.

To be familiar with the Spanish ethical and deontological code of nursing, and to understand the ethical implications of health in a changing world.

Capacity for ethical sense and commitment.

To understand people without prejudice taking into consideration their physical, psychological and social aspects and to see them as autonomous and independent, ensuring their opinions, beliefs and values are respected and guaranteeing their right to intimacy through confidentiality and professional secrecy.

To promote and respect the right to participation, information, autonomy and informed consent in the decision-making of patients in line with how they experience their health-illness process.

Specific skills

To be familiar with and apply the principles underpinning comprehensive nursing care.

To promote the participation of people, families and groups in the health-illness process.

To be familiar with applicable legislation and the ethical and deontological code of Spanish nursing, inspired by the European code of ethics and deontology in nursing.

To provide care ensuring the right to dignity, privacy, intimacy, confidentiality and the decision-making capacity of patients and families. To provide customised care taking into consideration age, gender, cultural differences, ethnic origin, beliefs and values.
