SKILLS

Basic Skills

Students must have demonstrated knowledge and understanding in an area of study that is founded on general secondary education. Moreover, the area of study is typically at a level that includes certain aspects implying knowledge at the forefront of its field of study, albeit supported by advanced textbooks

Students must be able to apply their knowledge to their work or vocation in a professional manner and possess skills that can typically be demonstrated by coming up with and sustaining arguments and solving problems within their field of study

Students must have the ability to gather and interpret relevant data (usually within their field of study) in order to make judgments that include reflections on pertinent social, scientific or ethical issues

Students must be able to convey information, ideas, problems and solutions to both an expert and non-expert audience

Students must have developed the learning skills needed to undertake further study with a high degree of independence

General Skills

To be familiar with the goals, syllabus content and assessment criteria of early childhood education

To develop abilities for interpersonal and intercultural communication.

To design and regulate learning areas in contexts of diversity, taking into consideration the specific educational needs of pupils, gender equality, egalitarianism and respect for human rights.

To promote coexistence inside and outside the classroom and promote the peaceful resolution of conflicts. To be able to systematically observe learning and coexistence contexts and to be able to reflect on them.

To be familiar with the foundations of child dietetics and hygiene. To learn the basics of early childcare and the foundations and developments making it possible to understand the psychological, learning and personality construction processes during early childhood.

To be familiar with the organisation of kindergartens and the diversity of actions carried out in them. To accept that the practice of teaching must be improved and adapted to scientific, educational and social changes throughout one's life.

Specific skills

To gain a practical understanding of the classroom and know how to manage said context.

To be familiar with and apply interaction and communication processes in the classroom and master the social skills and abilities needed to foster an atmosphere that encourages learning and coexistence.

To control and monitor the educational process and, in particular, the teaching-learning process by mastering the necessary techniques and strategies.

To tie theory and practice in with the reality of the classroom and centre.

To take part in improvement proposals in the various fields of action that may be established in a centre.
